

Stelo 10 litre bins can be produced in post-consumer recycled plastic certified "Plastica Seconda Vita" (Second-Life plastic) from the Italian Institute for the Promotion of Recycled Plastics. This option supports the objectives for Green Procurement with the re-use of recycled plastic materials, to help minimise the impact on the environment in manufacture.

Sartori Ambiente is certified according to ISO 9001 and ISO 14001.

Items are packed using PEFC certified pallets.

STELO 10

The kitchen caddy that breathes for ultimate performance

STELO 10

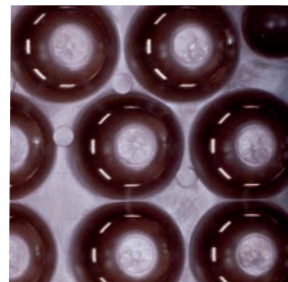

Stelo 10 vented kitchen caddy has been created to simplify the segregation and collection of food wastes, optimising aerated conditions to reduce moisture and unpleasant smells.

Handle with lid locking mechanism

Aeration slots in the body for complete ventilation

Special base to optimise air circulation

Wide front lip for finger-tip lid opening

Radius corners to suspend a compostable liner

Width W (mm)	Depth D (mm)	Height H (mm)	Volume (L)	Standard colours

* with handle | The manufacturer reserves the right to apply technical and aesthetical changes without notice

- . **Total aeration system** for the segregation of food waste in optimum conditions
- . For use in conjunction with a compostable liner, a **breathable** biobag with **transpiration properties**.
- . Moisture is reduced by 15-30% through evaporation, avoiding the build-up of liquids at the base.
- . **Reduction of unpleasant odours** caused by anaerobic bacterial activity.
- . The daily tasks of food waste segregation are made **easy, safe and more hygienic**.
- . Extra wide filling from dinner sized plates or chopping boards.
- . **Minimal footprint** for placing on a worktop, inside a cupboard door or under the sink.

TECHNICAL FEATURES

Capacity

- . 10 litres

Material

- . 100% virgin recyclable PP, with options for recycled content.
- . Stabilised against the effects of UV light, resistant to chemical detergents and biological matter.
- . Dishwasher safe

Lid

- . 100% virgin recyclable PP, with options for recycled content.
- . Stabilised against the effects of UV light, resistant to chemical detergents and biological matter.
- . Wide front lip for finger-tip lid opening
- . Close fitting hinged lid
- . Micro holes in the lid to maximise ventilation
- . Detachable lid for easy cleaning

Body

- . Air slots in the walls for complete air circulation
- . Retaining rim and lowered hinges for fitting a compostable liner
- . Radius corners to allow a biobag to be suspended in the caddy
- . Front printing panel for corporate identity

Handle

- . Vertical single piece black plastic handle with two pivot points
- . Sturdy strong grip
- . Allows the lid to be propped open
- . With lid locking mechanism to prevent spillage and interference from pets

Options

- . Certified post-consumer recycled PP content
- . Thermal transfer printing in white on body front panel
- . Lid imprinting
- . Lid with black plastic handle, without locking mechanism
- . Wide range of other colours available on request
