

PAC Baler

D-Series

The PAC50 D baler with a vertical sliding door is designed for manual strapping of the bales with wire in a horizontal direction.

Pressing forces of 50 tons with a closed press chamber results in very high bale weights, even on difficult materials. The bale size is 75x110cm with a length of approx. 1.2m.

The PAC baler has a small footprint due to the vertical, hydraulically operated door, but still incorporates full bale ejection (very long ram stroke). The ejection of the finished bales is made easy with full bale ejection rather than machines with only partial ejection.

PAC Baler D-Series Overview

Features

- Compaction against the closed tunnel door
- Compact construction and vertical door
- Hydraulically operated tunnel door
- Remote monitoring functionality as standard

Benefits

- High bale weights
- Low space requirements
- Easy bale ejection
- Easy operation

Technical Data and Measurements

PAC D-Series	Measure	50 D
Pressing Force	T (kN)	50 (486)
Spec. Pressing Force	N/cm2	59
Tunnel Cross Section	Mm	756 x 1150
Hopper Opening	Mm	1150 x 1600
Bale Length	Approx. Cm	120
Number of Ties	Total	4
Driving Power	kW	11
Press Output (Ideal)	Max. m3/h	92
Cycle Time (Ideal)	Approx. Sec	45
Power Supply	415V 3 Phase N & E 32A	
Fuse Protection	A

Kadant Paal Limited is the UK's leading manufacturer of waste compaction based in Derbyshire. The company has been manufacturing the DICOM range of waste compaction equipment for over 40 years. Our primary products include a wide range of static and portable compactor models as well as vertical and semi-automatic closed end balers. Kadant Paal is a leading international manufacturer of horizontal auto tie balers, all manufactured at their German factory in Osnabruck.
