

BACKHUS A 30

Eggersmann Windrow Turners

The robust BACKHUS A 30 is the solution for composting on a smaller scale. With a maximum windrow width of 3 m and a turning capacity of up to 700 m³, it is perfect for farms with a focus on livestock.

Product Highlights

- › Self-propelled – no tractor required
- › Compact transport dimensions for inter-site use
- › Rotor adjustable under load; direction of rotation reversible
- › Track clearer with automatic ground contour adjustment
- › Rubber tracks with high traction

Applications

- › Animal Manure
- › Green Waste
- › Digestate
- › Empty Fruit Bunches
- › Biosolids
- › Soil Remediation
- › Sewage Sludge

Product Features

Operation

- › Intuitive control
- › Robust design

Track Clearers

- › Automatic ground adjustment
- › Height adjustable

Easy Transportation

- › Perfect for contractors
- › Perfect for cooperatives

Versatile in Use

- › Maximum process control
- › Infinitely adjustable rotor speed
- › Height adjustment of the rotor independent of the frame
- › Rotor is reversible

Easy to Maintain

- › Free access to the engine compartment

Technical Specs *

Power (kW/PS)	33 / 45	
Turning Capacity up to (m ³ /h)	700	
Weight (kg)	1,500	
Windrow Width (mm)	3,000	
Windrow Height (mm)	1,300	
Dimensions	Work	Transportation
Length (mm)	2,600	4,200
Width (mm)	3,550	1,350
Height (mm)	1,950	1,950
