# DELTA LIGHT

Delta is the stylish container made for the separate collection in the workplace, at school, in the hospital and in public places.

## TECHNICAL FEATURES

The body is made of sturdy cardboard while the lid is in recycled PP; due to its modular structure the user can create a customized composition according to the waste quantity produced.

Special openings to be found in the body allow several containers to be fixed together to create a collection area.

It can be used with liner available separately.

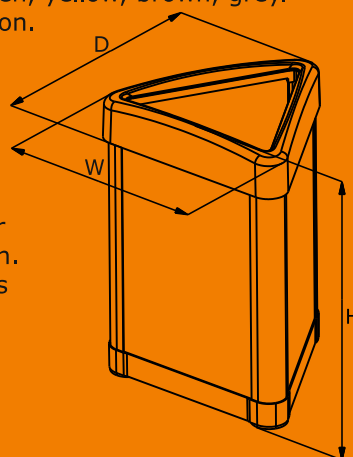

The lid has a liner hold-on function and it's available in several colours as well as in the glass-collection version.

### Lid

- . Made of recycled PP, "Plastic Second Life" certified.
- . Colours available: blue, green, yellow, brown, grey.
- . Lid with liner hold-on function.

### Options

- . Glass-collection lid (red).
- . Walls' customization with monochromatic printing.
- . Lid's customization with thermal transfer printing for waste typology identification.
- . Cardboard body available as spare part.
- . Liners made of PE or biodegradable material.

| Height H (mm) | Width W (mm) | Depth D (mm) | Volume (L) | Glass-collection (mm) | Glass Nr. | Lid standard colours | Glass-collection lid colours |
