ΔELTA

Delta is a stylish container devised for indoor collection of recyclable materials in offices, schools, hospitals and public places.

TECHNICAL FEATURES

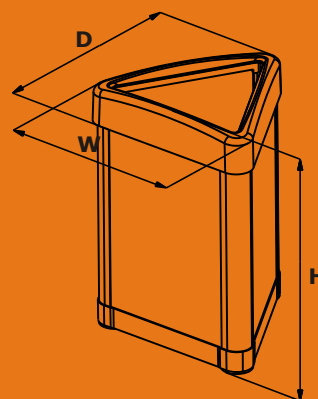

Delta is constructed from recycled PP and aluminium.

The modular structure allows the user to select totally customised bin compositions, according to the different types and quantity of resource material to be segregated.

The lid is devised to retain a sack liner and it is available in a range of different appealing colours.

Optional:

- . Plastic cup collection lid aperture
- . Customised printing on body sides
- . Translucent walls
- . Adhesive vinyl labels for resource material identification
- . Non standard heights: 800 and 300 mm.

Height H (mm)	Width W (mm)	Depth D (mm)	Volume Lt	Cup-collector (mm)	Nr. of cups	Standard colours open lid	Colours cup-collector lid
700	320	285	27	Ø 72 standard	270		
600	320	285	23	Ø 72 standard	225		
500	320	285	19	Ø 72 optional	180		
400	320	285	15	Ø 72 optional	135
